The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-2 rejected under 35 U.S.C. 103(a) as being unpatentable over Dunn et al.

With respect to claims 1-2, Dun et al disclose a process for treating liquid in the form of water from a process step in a food processing plant (see FIG. 1), the process including chlorinating the water (see step 16 of FIG. 1 and the first paragraph of col. 3) and then filtering the chlorinated water (see step 20 and the second paragraph of col. 3), wherein substantially all contaminants are removed from the water. Dunn et al fail to specify chlorinating the water with 30-50 ppm chlorine, however, such a modification would have been obvious in order to optimize the process for a particular degree of water purity desired for a specific application.

Applicant's arguments with respect to claims 1-2 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
